SCREEN PRINTING PRESS PALLETS

Anatol offers a wide variety of screen printing pallets in various types and sizes to accommodate all your printing needs.

Hold-Down Pallet

- 16"x 22" print area
- No need to readjust the press - remove the standard pallet and mount the hold-down pallet and continue printing.
- This pallet is intended for printing on products with a slippery lining. It smooths out creases and keeps the surface flat and taut for easy, consistent printing
- The pallet automatically holds down the product during printing without the need for adhesive, speeding up production.
- The pallet is designed in such a way that it cannot be opened during printing, keeping both the operators and the printed products safe.
- Easy opening - just a slight lift of the pallet lid is required and the pallet opens fully and independently and fixes itself in the open position.
- Force required for opening and closing can be adjusted as desired.
- The pallet is compatible with Anatol manual and automatic presses.

Face Mask Pallet

- This pallet is designed for printing on special surfaces that require additional fixation through a hold-down mechanism, like face masks.
- The size and shape of the pallet can be specially made to the customer's specifications, with a maximum print area of 7" x 5".
- This pallet is intended for printing on products with a slippery lining. It smooths out creases and keeps the surface flat and taut for easy, consistent printing.
- You can print on one or two products at the same time with this pallet.
- The pallet automatically holds down the product during printing without the need for adhesive, speeding up production.
- The pallet is designed in such a way that it cannot be opened during printing, keeping both the operators and the printed products safe.
- Easy opening - just a slight lift of the pallet lid is required and the pallet opens fully and independently and fixes itself in the open position.
- Force required for opening and closing can be adjusted as desired.
- For a secure hold-down, rubber plates are placed around the perimeter of the pallet that securely fix and hold the product during printing.
- The pallet is compatible with Anatol manual and automatic presses.

Umbrella Pallet

- This pallet is designed for printing on umbrellas. The pallet holds the umbrella securely in place and keeps the surface flat and taut for easy, consistent printing.
- For a secure hold-down, rubber plates are placed around the perimeter of the pallet that securely fix and hold the product during printing.
- No need to readjust the press – remove the standard pallet and mount the hold-down pallet and continue printing.
- The cover closes automatically and secures the umbrella panel to the rubber surface of the pallet. The pressure level can be adjusted by the operator.
- The pallet is compatible with Anatol manual and automatic presses.

Hold-Down Pallet compatible with PRODIGY

- 8" x 8" or 10" x 12" print area
- No need to readjust the press – remove the standard pallet and mount the hold-down pallet and continue printing.
- This pallet is intended for printing on products with a slippery lining. It smooths out creases and keeps the surface flat and taut for easy, consistent printing.
- The pallet automatically holds down the product during printing without the need for adhesive, speeding up production.
- The pallet is designed in such a way that it cannot be opened during printing, keeping both the operators and the printed products safe.
- Easy opening - just a slight lift of the pallet lid is required and the pallet opens fully and independently and fixes itself in the open position.
- Force required for opening and closing can be adjusted as desired.
- The pallet is compatible with Anatol Prodigy small format automatic presses.

Face Mask Pallet compatible with PRODIGY

- This pallet is designed for printing on special surfaces that require additional fixation through a hold-down mechanism, like face masks.
- The size and shape of the pallet can be specially made to the customer's specifications, with a maximum print area of 10" x 6".
- This pallet is intended for printing on products with a slippery lining. It smooths out creases and keeps the surface flat and taut for easy, consistent printing.
- The pallet automatically holds down the product during printing without the need for adhesive, speeding up production.
- The pallet is designed in such a way that it cannot be opened during printing, keeping both the operators and the printed products safe.
- Easy opening - just a slight lift of the pallet lid is required and the pallet opens fully and independently and fixes itself in the open position.
- Force required for opening and closing can be adjusted as desired.
- The pallet is compatible with Anatol Prodigy small format automatic presses.

Double Sleeve Pallet

- These pallets are designed for printing on sleeves and pant legs.
- You can print on both sleeves or pant legs at the same time.
- The pallets are designed for maximum strength and rigidity, ensuring consistent printing along the entire length of the sleeve or pant leg.
- No need to readjust the press – remove the standard pallet and mount the sleeve pallet and continue printing.
- The pallets are compatible with Anatol manual and automatic presses.
